Abstract

One of the requirements of a Ph.D. or Master is to write traditional and systematic reviews, critiques, letters to editors (LTE), case reports or case studies, at least one original article, and sometimes a meta-analysis, all with proficiency and inspiration. This presentation focuses on the ideas from research to publication, i.e., how to depict a distinct image in our mind in order to convert our research into various types of academic papers. Also, this presentation provides a general approach and some key points for writing and successfully publishing journal papers. The presentation will also cover some publication ethics guidelines, ethics of reporting questionnaire-based research, authorship criteria, plagiarism detection and how to avoid plagiarism, duplicate publication, and salami publication.

Keywords: Scientific writing, journal paper, original articles, case report, ethics.

1. Declaration of conflicts

This article was presented at ICHSMT'16 as a key notes.

2. Authors' biography

Dr. Mehrdad Jalalian is editor-in-chief of Electronic Physician Journal. He is also a researcher on publication ethics, scientific writing, and scholarly publishing.
